SUGGESTION

MAJOR (2)

File: `samples/index-1.py` target line: 42

Approved

Issue

SQL injection vulnerability in query string without parameterization.

Recommended Fix

use parameterized queries with bound values.

File: `samples/index-1.py` target line: 63

Approved

Issue

No error handling in PDF generation.

Recommended Fix

add try/except around output and file operations.

MINOR (3)

File: `samples/index-1.py` target line: 44

Approved

Issue

Hardcoded RGB values used in multiple locations.

Recommended Fix

use constants or define color tuples once.

File: `samples/index-1.py` target line: 118

Approved

Issue

Unoptimized $O(N^2)$ loop in code suggestion.

Recommended Fix

replace with set lookup for faster iteration.

File: `samples/index-1.py` target line: 104

Needs Review

Issue

Hardcoded "helvetica" font used across multiple sections.

Recommended Fix

use a more generic or system-native font.

Developer Comment

Recheck

Model Response

The hardcoded "helvetica" font is used consistently across the document, and while some fonts are system-native, "helvetica" is not universally available on all systems. Using a more generic system-native font would ensure compatibility and consistency across platforms.

● SUGGESTION (1)

File: `samples/index-1.py` target line: 40

Approved

Issue

Repeated "ln(0)" parameter in cell calls.

Recommended Fix

use consistent `new_y` parameter for alignment.
