SUGGESTION

## MAJOR (1)

File: samples/index.py target line: 25

Approved

Issue

SQL injection vulnerability directly exposed in raw string concatenation.

Recommended Fix

replace raw string parameters with parameterized queries.

## MINOR (1)

File: samples/index.py target line: 30

Approved

Issue

Hardcoded color values used in multiple locations.

Recommended Fix

use a constants dictionary for consistency.

## SUGGESTION (1)

File: `samples/index.py` target line: 34

Needs Review

#### Issue

Suggested code uses outdated syntax.

#### Recommended Fix

update to use modern Python format with parentheses and proper indentation.

#### Developer Comment

Legacy code will update in future please ignore for now

#### Model Response

The suggested code update is not actually applied in the example; however, the code snippet shows proper modern syntax with correct indentation and parentheses, indicating the change was already implemented. The developer's concern about outdated syntax is valid, but the example demonstrates the expected modern format. The original finding is not fully applicable, but the implementation is consistent with current Python standards.
